

30 Deg Elbow

Features

- › Suitable for heavy pressure vessel 30°elbow internal surface automatic cladding with Tungsten electrode automatic TIG wire filling processes.

Specification

Elbow bending radius: 300~1200mm.

Elbow outer diameter: $\leq \phi 800$ mm.

Elbow inner diameter: 180~700mm.

Elbow weight: ≤ 800 kgs.

AVC tracking and shutdown memory function.
