

Gantry Type CNC Plasma Cutting Machine

Features

- Advanced Technology, moderately priced
- Low on maintenance & Easy to use
- Highly robust and rigid mechanical system
- Longitudinal axis motion over T90 railway rails
- Anti-collision system for protecting plasma torch from damage during collision
- Commonly offered with Powermax and MAXPRO200 plasma systems of Hypertherm
- Dual synchronized servo drive system for long axis motion

Process	Gas Cutting, Plasma Cutting
Effective cutting width	1.5 m to 3 m
Effective cutting length	3 m to 20 m
Positioning speed	0 – 10,000 mm/min
Cutting thickness	1.5 mm – 30 mm MS by plasma cutting 1 mm – 28 mm SS by plasma cutting 6 mm – 150 mm MS by gas cutting
